

Passolution

The Central Data Base for Passport and Visa Regulations Worldwide

A possibility to filter and access all up-to date entry regulations for more than 198 destinations and more than 198 nationalities from one central site. Seems impossible? It isn't, because that is exactly what Passolution makes possible! In this extensive data base not only passport and visa information are provided, but also current travel advices as well as health-related recommendations are listed. Here, you and your customers find all information at one glance in an easily understandable overview, available at any time.

Our data base encompasses amongst others

- details for people with dual citizenship
- entry regulations for minors travelling on their own or with just one parent
- information in case of lost/stolen travel documents
- visa offices
- health details for pregnant women and children
- vaccination recommendations
- and much more

With our service we support tour operators and travel agencies with the implementation of the pre-contractual duty to supply information, which is in place since the enforcement of the new EU package travel directive in July 2018. Through the connection to our system, you can deliver your customers all relevant information at the push of a button. And this information is available in seven different languages: German, English, French, Spanish, Italian, Dutch and Polish.

Your benefits

- reliable information
- uncomplicated and fast
- no time-consuming research
- all information in one overview for delivery to your customer
- documentation of all delivered data
- automated release of our data via your mid-/backoffice-provider
- manual access via our web version
- and much more

You have already delivered the information, but the trip commences in the later future? We have also thought of this and developed a technical process with which you can keep your customers up-to date after the booking until the departure with regards to the respective entry regulations. Simply use the integrated comparison tool for the different versions of the data set. In addition, we keep you updated with our info system displaying all important changes concerning entry, visa or vaccination regulations!

Therefore, we do not only support you in fulfilling the legal information requirements, but also take care that you can offer your customers a holistic service. To top our offer off, we are connected to a visa provider, where your customers can apply for the desired visa at special conditions.
